Malawi 2025 Energy Storage Project

Overview

Will Malawi build a nuclear power plant in 2035?

The Malawi Government has decided to harness nuclear energy for electricity generation. The first nuclear power plant is expected to be commissioned by 2035.

How can Malawi achieve a cleaner energy future?

The project will also contribute to a cleaner energy future for Malawi, reducing reliance on costly diesel generators, cutting carbon emissions by ~10,000 tonnes annually, and unlocking the full uptake of at least 100 MW of variable renewable energy, such as solar and wind power, into the grid.

What is the Malawi Bess project?

The Malawi BESS project will guide the scale-up of BESS projects in the Consortium's participating countries. To alleviate energy poverty by 2030 and save a gigaton of CO2 in low and middle-income countries, it is estimated that 90 GW of BESS must be developed to support the required 400 GW of renewable energy.

Can Malawi achieve universal electricity access by 2030?

We look forward to continuing our partnership with the Government of Malawi to support the country's ambition to achieve universal electricity access by 2030 as we pursue the goals of Mission 300: connecting 300 million Africans to electricity by 2030 at unprecedented scale and speed."

Malawi 2025 Energy Storage Project

[Powering Malawi's Growth: Escom's 20MW Battery Energy Storage Project](#)

Nov 12, 2025 · The energy sector is a crucial component of Malawi's economy, and the government is taking steps to invest in its development. The BESS Project, funded by the ...

[Malawi Seeks Indian Battery Storage for a Stable Energy Future](#)
