Malta portable power bank BESS

Overview

What is a battery energy storage system (BESS)?

Interconnect Malta Ltd. (ICM) has been entrusted the responsibility to implement two Battery Energy Storage Systems (BESS) to be connected to the Maltese National electric grid network. BESS is essentially a group of large batteries configured to store and dispatch electrical energy with very fast response when required.

How does the Bess project affect PV generation in Malta?

The BESS project is also intended to mitigate weather-related challenges posed by renewable energy sources, which are reliant on climatic conditions and can therefore lead to significant dips in generation during moments of sudden cloud coverage severely affecting the PV generation in Malta.

Are Bess systems the key to modernizing Malta's distribution network?

She emphasized that initiatives like these are vital steps toward large-scale renewable projects, such as offshore wind. Dr. Ing. Joseph Vassallo, Divisional Manager at ICM, highlighted that the BESS systems are key to modernizing Malta's distribution network.

How much power will Marsa Power Station have?

The first system (BESS 1), rated at 20MWh (8MW), will be located in the underground tunnels of the former Marsa power station while the second system (BESS 2) shall have a rating 64MWh (32MW) and shall be located within the precincts of the Delimara power station.
