

# **Mobile energy storage container fast charging sales in Democratic Republic of Congo**

## Overview

---

Why is the Democratic Republic of the Congo so important?

Although China has invested capital into multiple mineral-rich nations, the Democratic Republic of the Congo (DRC) stands out because of its vital role in the cobalt market. The DRC produces 80 percent of the world's cobalt—Chinese state-owned enterprises and policy banks control 80 percent of the total output.

What is happening in the DRC?

The DRC, Africa's second-largest and fourth most populous country, has been devastated by internal conflict for decades, including two wars since the mid-1990s and ongoing rebel violence in the east that required a 24-year-long UN peacekeeping mission, with Chinese participation.

Why is the DRC important to China?

The DRC is essential to China's position in the global market: 67.5 percent of China's refined cobalt comes from the DRC.
