

# **New Energy Power Station Energy Storage Power Station**

## Overview

---

What is Ningxia power's energy storage station?

On March 31, the second phase of the 100 MW/200 MWh energy storage station, a supporting project of the Ningxia Power's East Ningxia Composite Photovoltaic Base Project under CHN Energy, was successfully connected to the grid. This marks the completion and operation of the largest grid-forming energy storage station in China.

Where is the new energies service station located?

The New Energies Service Station is located on a part of the vacant land surrounding the Geelong Refinery, proximate to the Princes Highway, which is owned by Viva Energy. The site is within an existing industrial zone with access to electrical infrastructure and recycled water from the nearby Barwon Water Northern Water Plant.

What is the largest grid-forming energy storage station in China?

This marks the completion and operation of the largest grid-forming energy storage station in China. The photo shows the energy storage station supporting the Ningdong Composite Photovoltaic Base Project. This energy storage station is one of the first batch of projects supporting the 100 GW large-scale wind and photovoltaic bases nationwide.

How many energy storage containers are there?

The installation comprises 48 energy storage containers, providing a total capacity of 250MWh and capable of delivering up to 50MW of power for five hours. Designed to provide critical grid stability, the BESS is a major step toward replacing fossil fueled generation with renewable energy.

## New Energy Power Station Energy Storage Power Station
