Nine outdoor power charging pile charging

Overview

How many green charging pile units are there in Shanghai?

State Grid Corp of China displays its charging facilities for new energy vehicles during a carbon neutrality expo in Shanghai in June. [Photo/China Daily]
Shanghai has put in place 1,526 green charging pile units since the beginning of this year for recharging new energy vehicles, State Grid Shanghai Municipal Electric Power Co said.

What are charging piles for new energy vehicles?

As one of the new infrastructures, charging piles for new energy vehicles are different from the traditional charging piles. The "new" here means new digital technology which is an organic integration between charging piles and communication, cloud computing, intelligent power grid and IoV technology.

What is a charging pile gateway?

The gateways meet the demand of all charging pile communication scenarios and collect real-time electricity consumption information of charging piles so as to realize information interaction on charging and discharging between the power grid and charging piles, as well as meet the demand on charging service expansion.

How many charging piles are there in China?

According to the latest statistics from the China Electric Vehicle Charging Infrastructure Promotion Alliance (EVCIPA), by the end of 2023, the total number of charging piles in China had exceeded 9 million, with public charging piles accounting for about 35% and private charging piles making up 65%.
