

# Off-grid solar power generation system in Antwerp Belgium

## Overview

---

Is Antwerp a good location for solar power?

Antwerp, Flanders, Belgium (latitude: 51.2192, longitude: 4.3917) is a suitable location for generating solar power through photovoltaic (PV) systems. The average energy production per day for each kilowatt of installed solar capacity varies across seasons: 5.35 kWh in summer, 2.33 kWh in autumn, 1.17 kWh in winter, and 4.56 kWh in spring.

How much solar energy does Antwerp use a day?

Average 2.33kWh/day in Autumn. Average 1.17kWh/day in Winter. Average 4.56kWh/day in Spring. To maximize your solar PV system's energy output in Antwerp, Belgium (Lat/Long 51.2192, 4.3917) throughout the year, you should tilt your panels at an angle of 43° South for fixed panel installations.

How to optimize solar generation in Antwerp Belgium?

Assuming you can modify the tilt angle of your solar PV panels throughout the year, you can optimize your solar generation in Antwerp, Belgium as follows: In Summer, set the angle of your panels to 35° facing South. In Autumn, tilt panels to 54° facing South for maximum generation.

Should you use the Belgian electricity grid?

Making use of the Belgian electricity grid is often taken for granted. Nevertheless, there is a perfect alternative: provide your own energy and be independent of expensive public grid energy. Your very own, local energy-generating system supplies your electricity. It doesn't even matter how you generate that energy (solar panels, wind, etc.).
