

Oslo portable ups uninterruptible power supply

Overview

What is an ups & how does it work?

UPS units are emergency power supplies that ensure uninterrupted power delivery. In the event of a power surge or outage, the UPS takes over as the primary power source. This allows, for example, the saving of current projects and the safe closure of documents. A UPS protects hardware components from the negative effects of power surges.

What is an on-line UPS (uninterruptible power supply)?

An on-line UPS (Uninterruptible power supply), consist of a battery, battery charger and inverter. The on-line ups is also termed as double conversion system. In the above types of the primary source of power is AC mains, while in case of on-line ups the primary source of power is inverter present in the UPS.

What are high-performance uninterruptible power supplies?

High-performance Uninterruptible Power Supplies - ensure that your equipment will always work regardless of voltage spikes and power failures.

Why should you choose a ups power supply?

The selection includes large UPS supplies for rack-mounted cabinets as well as smaller units for use with a single computer setup. UPS power supplies offer convenience and security. They allow you to better care for your equipment's needs and protect it against unforeseen events.
