

Outdoor Power Indoor Lighting

Overview

Are outdoor lights safe to use indoors?

Outdoor lighting is superbly well-suited to use inside your home. Unlike indoor lights, outdoor lights are robust and weatherproof, which makes them perfectly safe to use indoors. But you need to consider the following points: correct voltage, lighting type, light bulb option and UL rating. Read on to find out the details.

What is outdoor residential lighting?

Outdoor residential lighting refers to simple to install LED lights designed for lighting your backyard, porch steps, pathways, and other places around your home. These lights are also battery powered, which means you don't have to worry about running wiring to nearby trees or around your yard.

What type of outdoor light should I use inside?

Deciding which type of outdoor light you'd use inside is pretty much decided by its intended purpose. Wall-mounted and string-type lights can be used inside, while pole-mounted lights are best left outside unless you have a custom mounting feature. Spotlights and floodlights deliver very bright light as they're made to light up larger areas.

Do outdoor lights run at 12 volts?

Many outdoor lights operate at 12 volts, so ensure the voltage before connecting the outdoor light to your home's supply. Houses generally run on a 120-volt electrical supply, so joining a 12-volt light to this circuit would result in the outdoor light being irreparably damaged.
