

# **Philippines solar Inverter Standards**

## Overview

---

What is a solar power inverter in the Philippines?

A solar power inverter in the Philippines not only converts the energy from the sun to usable energy but also serves as a communicating device that tells whether your solar PV system is experiencing problems.

What is a solar PV guidebook?

This Solar PV (SPV) Guidebook is meant to give guidance to SPV project developers as well as to decision makers within the Philippine energy sector and other stakeholders to ensure efficient administration and timely implementation of solar projects in the Philippines.

How long does a solar power inverter last in the Philippines?

At Solaric, solar power inverters we've installed throughout the country resulted in drastic monthly electric bill drops, with homeowners noticing up to 50% reduction in their bills. If you purchase a solar power inverter in the Philippines, you can expect to recover from your investment within 6 to 7 years of use.

What is a solar power inverter?

You can say it is the brain or center processing unit of solar PV systems. A solar power inverter functions by converting the direct current (DC) output of a solar PV system into an alternating current (AC). AC is fed into your home to power all your items that need electricity including appliances and gadgets.
