Power Box Move
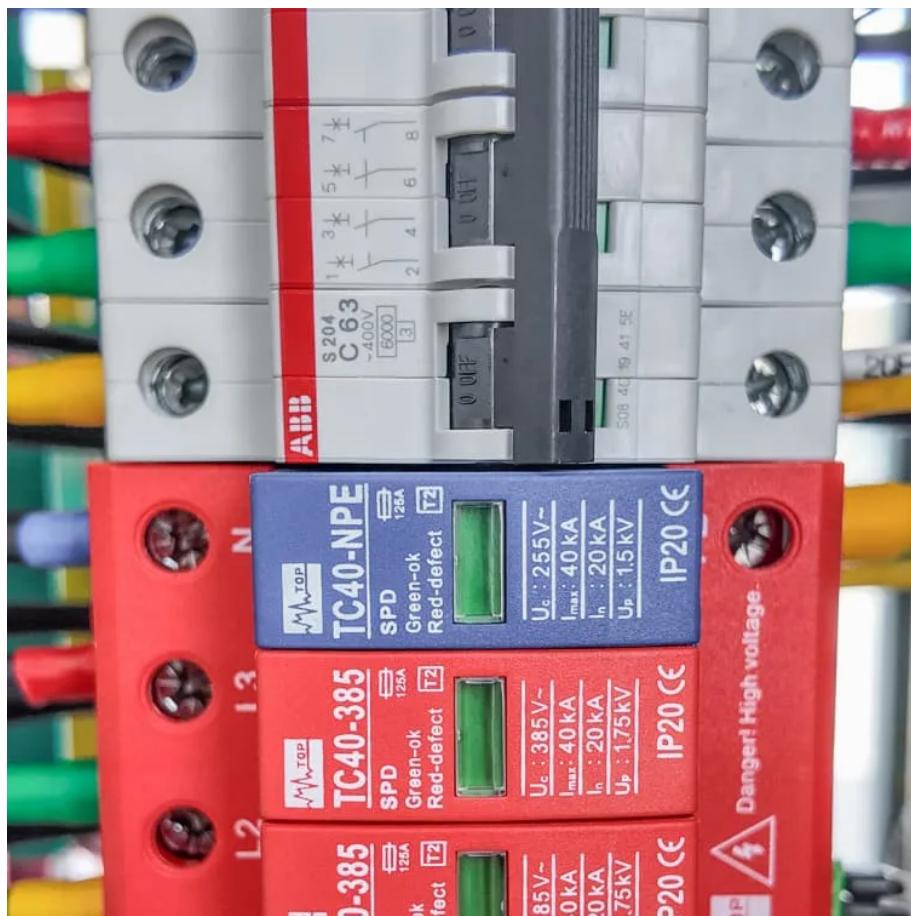

Overview

APPLIES TO: Power BI Report Builder Power BI DesktopText boxes are the most commonly used report item in Power BI paginated reports. You can add a text box to the report bod.

How do I move a text box in Power BI?

Moving text boxes has always been difficult in Power BI. You often end up selecting the text itself! In the image above I clicked and dragged on the text box but it selected the text instead of moving the object. If you want to ensure you move the visual you can click and drag the visual header.

What is a text box in Power BI?

APPLIES TO: Power BI Report Builder Power BI Desktop Text boxes are the most commonly used report item in Power BI paginated reports. You can add a text box to the report body to display information such as titles, parameter choices, built-in fields, and dates. Every cell in a table or matrix is really a text box.

How do I move items in Power BI?

Moving items in Power BI is something that you will do VERY often. In certain instances you will only move 1 at a time, but every so often it is necessary or at least helpful to move some together. This first off two options, are to click each visual, while keeping your CTRL button in. Then move them to where you want them.

How to move a text box in AutoCAD?

This first off two options, are to click each visual, while keeping your CTRL button in. Then move them to where you want them. Second of the 2 options, is to simply keep you left mouse button in and drag over all visuals, and then moving them. This option can also be used in Tip 1, moving a text box.
