

Price of energy storage vehicle in Zurich Switzerland

Overview

How to charge an electric car in Switzerland?

In general, there are three options for charging your electric car: The cheapest way to travel is by charging at home using your own wallbox, as you pay the regular electricity price of your energy supplier here. In Switzerland, the average is between 15 cents and 30 cents per kWh.

How much does a charging station cost in Switzerland?

These are usually expensive and cost between 50 cents and CHF 1 per kWh. Good to know: in Switzerland, parking spaces with the 'charging station' symbol are exclusively intended for charging electric cars. This means that the vehicle has to be actively charging the entire time it is parked.

What is the future of electricity storage in Switzerland?

One important pillar of this strategy is the further development of electricity storage capacity in Switzerland. In the next years, three large-scale pumped hydro storage power plants will be connected to the grid. The first, the Limmern pumped storage plant (1 GW), should become operational in 2016.

How much does electricity cost in Switzerland?

In Switzerland, the average is between 15 cents and 30 cents per kWh. For 2025, the median electricity price for households is 29 cents per kWh (2). Do you own your own home and want to be as independent of fluctuating electricity prices as possible?

Then it's worth investing in a photovoltaic system.
