

# **Price of solar panels on factory roofs in Central Africa**

## Overview

---

How much does a solar PV system cost in South Africa?

A large solar panel and a battery that will power 120W will cost between R9,000 and R16,000. This is equal to about 5 lights or a TV, or a fridge. A 1.5kW – 3kW solar PV system, with batteries, can power 280-305 W and will cost in excess of R50,000.

How much does solar cost in Africa?

Capital costs for solar are 3 to 7 times higher in Africa than in developed countries, and the continent only receives 3% of global energy investment - fare from the \$200 billion per year needed to achieve energy access and climate goals.

How much does it cost to install solar panels in South Africa?

According to the guideline you can expect to pay anywhere from R2,000 to R50,000+ for a solar and battery installation. One or two small solar panels and battery that will power 10-20 W will cost between R2,000 and R5,000. This is equal to a couple of lights and a cellphone charger.

Can solar panels be installed on a roof in South Africa?

In South Africa, most houses have tiled, pitched roofs. However, there are a few other types, like metal or thatched roofs. Tiled and corrugated roofs are perfect for installing solar panels, but thatched roofs are highly flammable and it is seriously dangerous to have solar panels installed.
