

Qatar solar Panel Project

Overview

Located 80 km west of Qatar's capital, Doha, the Al Kharsaah Solar PV Independent Power Producer (IPP) project is the country's first large-scale solar power plant and is set to significantly reduce its environmental footprint. Why is Qatar launching a solar power plant?

The start-up of the Al Kharsaah solar power plant represents a milestone in the country's energy history, since it is set to produce 10% of its peak electricity demand at full capacity. Over its lifespan, it will also enable Qatar to reduce its CO₂ emissions by 26 million metric tons.

What is Qatar's largest solar power project?

Samsung C&T E&C Group has been awarded the contract for Qatar's largest solar power project, underscoring its growing leadership in renewable energy infrastructure. Commissioned by QatarEnergy, the 2,000MW Dukhan Solar Power Project represents the largest capacity solar facility ever undertaken by a Korean construction company.

How many solar panels does Qatar have?

Spanning 27□—equivalent to 3,790 football fields—the massive site will be fitted with 2.74 million solar panels. Upon completion in 2030, the plant will generate enough electricity to power approximately 750,000 households, even considering Qatar's high per-capita energy use.

How has Qatar improved its solar energy sector?

Since the launch of Al Kharsaah plant in 2022, with an initial capacity of 800 megawatts, Qatar rapidly enhanced its solar energy sector, doubling its capacity within just three years, which is a remarkable achievement in itself.
