Overview

What is a solar panel racking system?

A solar panel racking system, or solar panel mount, is a structure that safely fixes the solar panels to various surfaces such as rooftops, ground surfaces, or pole installations. Racking systems typically include aluminum or steel components designed to securely hold solar panels in place.

How much does a solar racking system cost?

The cost of a racking system for solar panels is approximately \$0.10 per watt, according to the National Renewable Energy Laboratory (NREL). On average, mounts and racking typically account for about 10% of the total solar system cost. The price mainly depends on the installation type, whether for a rooftop, ground surface, poles, or canopy.

Does solar racking work on a roof?

Proper solar racking safely affixes solar panels to buildings, so your racking system must be compatible with your roof. The essential components of a solar racking system include flashings, mounts, rails, and clamps. The top solar panel racking brands include SnapNrack, Unirac, IronRidge, Quick Mount PV, EcoFasten, and AllEarth Renewables.

What is the best solar racking system?

As one of the best solar racking systems, the MightyMount System is highly versatile. Its MightyMount Comp-S attachment, designed as a space-saving solution, effortlessly fits onto a single course of shingles, eliminating the need for more complex elements.
