

Slovakia Energy Storage Power Supply Procurement

Overview

What is the main source of electricity in Slovakia?

Nuclear power plants are the main source of electricity production in Slovakia. In 2022, over 59 percent of total electricity generation in the country was derived from this source. By comparison, hydroelectric power plants accounted for 13.7 percent of power production, the most of any renewable source.

What is Slovakia's future energy mix?

Since January 2005 volumes of cross-border trades and transmission through Slovakia's transmission system are not limited. Slovakia's future energy mix will take into account three pillars - security of supply, technical availability and energy price. Total heat supply in 2022 reached 15 033 GWh, up 0.7% compared to 2021.

Are electricity prices regulated in Slovakia?

liberalised in 2005 - wholesale price is not regulated. Prices of electricity import and export are fixed on the basis of bilateral contracts between buyer and seller. Since January 2005 volumes of cross-border trades and transmission through Slovakia's transmission system are not limited.

Will Slovenské elektrárne be able to build a small modular reactor?

In 2023, Slovenské elektrárne (country's major electricity producer) and its partners were successful in an international competition under the Phoenix project and will receive a grant to fund a feasibility study for small modular reactors at 5 sites. **YOUR ATTENTION!**
