Overview

Should I upgrade or expand my solar panel system?

Upgrading and expanding your existing solar panel system could be your answer. When it comes to solar energy, maximizing efficiency and optimizing performance are crucial.

Why should I upgrade my solar panels with SolarEdge power optimisers?

Due to the cost of having these faults repaired many customers choose to upgrade their panels with SolarEdge power optimisers at the same time. This has many benefits including better system performance and unsurpassed monitoring of every part of the solar PV system.

Should I upgrade my solar system?

To determine if upgrading is the best option for your solar system, assess its performance, consider your energy needs, and consult with a professional solar installer. They can provide expert advice on optimizing your solar infrastructure and expanding its capacity to meet your evolving energy requirements.

Should I buy a solar system or upgrade my electrical panel?

Before you purchase a solar system or evaluate your electrical panel for upgrading, you need to have an idea of your home's typical energy consumption. This means adding up all the power your home uses for lighting, appliances, heating, cooling, and anything else.
