

Solar automatic sprinkler pump

Overview

Can a sprinkler with solar water pump save electricity and water?

This electrical energy is used to operate the water pump connected with sprinkler for irrigation. The main objective of the study is to present a best method for saving electricity and water. In a water irrigation system, the sprinkler with solar water pump is used to minimize the usage of water and reduce the consumption of electricity.

How a solar powered automatic irrigation system irrigates a farm?

In the field of Agriculture, the importance of automatic irrigation control system cannot be overemphasized. The project presents the design and implementation of "Solar Powered Automatic Sprinkler Irrigation System" that irrigates a farm by switching a DC water pump based on the set-time and the time interval programmed into the microcontroller.

What is solar water pumping system?

Solar water pumping system is to reduces the usage of diesel fuel or coal-based electricity. The use of diesel-based water pumping systems requires not only expensive fuels, but also create noise and air pollution.

How a sprinkler system works?

The sprinkler is used to spray water in the irrigation field for reducing the usage of water consumption. The photo- voltaic (PV) technology used for producing electricity is used to operate the motor used for solar pump.
