Where can I test my solar modules and components?

Conduct PV testing of your solar modules and components at our accredited photovoltaic testing laboratory. Solar certification services available.

What is a solar cell testing kit?

It is an all-in-one solution for the rapid characterization of solar cells. We have designed the I-V test system and solar simulator to work seamlessly together and tested their performance against other solutions. With our solar cell testing kit, you can be confident that reliable device metrics are only a few clicks away.

Can sinovoltaics test solar PV and battery energy storage components?

Sinovoltaics can test solar PV and battery energy storage components and raw materials on nearly any imaginable lab test. Whatever PV and battery energy storage component, whatever laboratory test - we are confident to offer you the most efficient, time-saving, and competitive testing solutions. > [About us](#).

What is the Ossila solar cell testing kit?

The Ossila Solar Cell Testing Kit includes both a source measure unit and an LED-based solar simulator. It is an all-in-one solution for the rapid characterization of solar cells. We have designed the I-V test system and solar simulator to work seamlessly together and tested their performance against other solutions.
