

# Solar container battery ggii

## Overview

---

How big is China's energy storage lithium battery shipments in 2024?

According to a survey conducted by the China Energy Storage Research Institute (GGII), in the first half of 2024, China's energy storage lithium battery shipments reached 116GWh, an increase of 41% compared to the first half of 2023 when it was 87GWh.

How did China's battery shipments perform in q1-q3 2024?

1. Power Battery Shipments Grew by 20%, Energy Storage Batteries by 70%  
According to preliminary research from Gaogong Industry Research Institute (GGII), China's lithium battery shipments reached 786 GWh in Q1-Q3 2024, marking a 30% year-on-year increase.

How big will lithium energy storage be by 2024?

GGII data shows that by 2024, the global installed capacity of front-end lithium energy storage will reach 63GW/165GWh, a year-on-year increase of +61.5%/77.4%. It is expected that by 2025, the global installed capacity will exceed 93GW/250GWh.

Could grid-scale batteries solve China's energy problems?

And because China's grid infrastructure is still playing catch-up to the crazy amounts of renewables it keeps building, curtailment is a real issue and much of that power simply goes unused for one reason or another. Grid-scale batteries could potentially remedy some of these issues in China and around the world.
