

# **Solar container energy storage system Project Background**

## Overview

---

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is a Solax containerized battery storage system?

SolaX containerized battery storage system delivers safe, efficient, and flexible energy storage solutions, optimized for large-scale power storage projects. As the world increasingly transitions to renewable energy, the need for effective energy storage solutions has never been more pressing.

What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.

How to implement a containerized battery energy storage system?

The first step in implementing a containerized battery energy storage system is selecting a suitable location. Ideal sites should be close to energy consumption points or renewable energy generation sources (like solar farms or wind turbines).
