

Solar energy storage device in Tuvalu

Overview

What is the Tuvalu solar power project?

The Government of Tuvalu worked with the e8 group to develop the Tuvalu Solar Power Project, which is a 40 kW grid-connected solar system that is intended to provide about 5% of Funafuti 's peak demand, and 3% of the Tuvalu Electricity Corporation's annual household consumption.

What is ADB's new solar project in Tuvalu?

“The project is under the Pacific Renewable Energy Investment Facility and has a \$6 million support. It is ADB’s first for Tuvalu’s energy sector,” the ADB said in a statement. “The project also installed solar PV in the outer islands of Nui, Nukufetau, and Nukulaelae.”.

Does Tuvalu need solar energy?

In response, Tuvalu has prioritized renewable energy as a dual strategy for mitigating emissions and adapting to climate impacts. Solar energy, in particular, is well-suited to Tuvalu’s tropical climate, which offers abundant sunlight throughout the year.

How much energy does Tuvalu use a year?

Like many Small Island Developing States (SIDS), Tuvalu has been heavily reliant on imported fuel for its diesel-based power generation system. Through this new FSPV system 174.2 megawatts per hour of electricity will be generated each year, meeting two percent of Funafuti’s annual energy demand.
