Solar energy storage solar container lithium battery in Rotterdam the Netherlands

Overview

Why are batteries so important in the Netherlands?

Batteries are indispensable for the energy transition. Yet the development of battery projects in the Netherlands lags behind that in other countries. This is because batteries in the Netherlands have to pay to take power from the grid.

Why do we need solar-PV systems in the Netherlands?

Developing new systems and solutions for a sustainable supply of clean energy, particularly solar energy, is crucial in this transition. The Dutch focus on solar-PV and energy storage In the Netherlands, the high demand for solar-PV systems drives our commitment to ensuring a sufficient and safe supply chain.

Will Eneco and EP NL invest in a battery storage project?

The storage project will make use of the plant's existing grid connection. But while making the announcement, the two companies were vocal about costly obstacles in the Netherlands for batteries. Eneco and EP NL have announced a joint investment in a 50 MW / 200 MWh battery storage project at the Enecogen power plant in the port of Rotterdam.

How many groendus solar plants are there in the Netherlands?

To date, there are more than 350 Groendus solar plants across the Netherlands. We install smart meters, charging stations and batteries. We help companies save energy and consume it smartly, with the help of our insights, energy monitoring and innovative energy management.
