Solar panel power generation installation in Sudan

Overview

What is the Guide to solar energy in Sudan?

“The Guide to Solar Energy in Sudan” is the first booklet of its kind in Sudan that targets consumer awareness at a “grass root” level, proudly developed by Clean Energy 4 Africa, and supported by several of the largest solar energy companies in the country.

What is the solar energy potential of Sudan?

The African Development Bank (AFDB) has another project in the west and north Kordofan states. Sudan possesses a relatively high amount of solar energy, the annual global horizontal irradiation (GHI) varies between 2118-2483 kWh/m²/year [7]. Sudan photovoltaic electricity potential is shown in Fig. 1.

Will Sudan scale up solar power projects?

Sudan is also contemplating scaling up projects on solar power in the coming years. Most of Sudan’s electricity generation comes from hydropower, and more than half of the Eastern African region’s total oil-based capacity is located in the country. Sudan is also contemplating scaling up projects on solar power in the coming years.

Are solar power generators a problem in Sudan?

An economic comparison between three types of electricity generators; stand-alone PV modules (50 Wp), two imported gen-sets (0.5, 2.4 kW), and a small mini-grid system (313kW peak) proved challenging in adopting PV systems in Sudan (Dongola and Northern Kurdufan).
