

# **Solar panels solar 2971186Z space**

## Overview

---

Who is SolarSpace power?

SolarSpace Power, as a world leading solar cell and solar module manufacturer, concentrating on high efficient solar technology production in China and overseas.

What does SolarSpace do?

SolarSpace focuses on the development and manufacturing of solar cell. With industry-leading technology and competitive manufacture capability SolarSpace rapidly increases production capacity and continuously provides the high efficiency and high quality cell products for customers.

Could space-based solar power be a centralized and weather-independent energy resource?

Space-based solar power (SBSP) could offer a centralized, weather-independent energy resource to help address these challenges. 6 By operating above the atmosphere and outside the day-night cycle, SBSP promises continuous gigawatt-scale power.

Could a space solar power station be the first?

As SBSP technology improves, many nations might compete to be the first in developing fully operational space solar power stations for the sake of securing energy independence and the economic advantages brought by an unlimited power source.
