

Solar power station for sale in London

Overview

What is Battersea Power Station?

Battersea Power Station is one of central London's largest, most visionary regeneration projects with one of the country's most well-known cultural and architectural landmarks – the iconic Grade II* listed Power Station – at its heart. Around every corner you'll find world-class architecture.

Should Battersea Power Station be sold?

In 2012 it was rescued by a consortium of Malaysian investors and in 2022 it finally opened as the behemoth retail and leisure destination it is today. Now, the owners of Battersea Power Station are apparently looking to put it on the market. If they do decide to go ahead and sell it, agents reckon it could go for an enormous £2 billion.

What is the London solar opportunity map?

The London Solar Opportunity Map is based on the interpretation of LiDAR data (where laser technology is used to measure distances) collected and made available by the Environment Agency. It provides an initial estimate of the amount of electricity that could be generated from panels both on rooftops and at ground level.

Can London get more solar?

The Mayor's Solar Action Plan sets out how City Hall programmes are expected to more than double London's current solar energy capacity. But the Mayor thinks London can, and should, go further than this and wants to provide support to local government, businesses and others to install more solar in London.
