

# **Solar power with grid backup in Poland**

## Overview

---

Is Poland ready for a high-voltage grid?

The Polish high-voltage grid as well as potential locations for photovoltaic and wind power plants. Poland's electricity sector is in the midst of a profound shift, driven by accelerating investment in wind and solar power. Since 2020, the share of renewables has nearly doubled – from 15% to almost 30%.

How does Poland look at solar energy isolated?

The cross -sector development - such as the integration of memory solutions and the coupling with other renewable energy sources - shows that Poland not only looks at solar energy isolated, but also tries to build up a future -proof, resilient and diversified energy system.

How many GWh of energy storage capacity will Poland have by 2035?

In a bid to tackle the challenge of the growing electricity production from renewable energy sources, the Polish utility is looking to add more than 10 GWh of energy storage capacity by 2035. Its plans involve more than 80 projects, the value of which is estimated at around PLN 18 billion (\$4.7 billion).

How many solar projects are there in Poland?

The country has ambitious plans to significantly expand its renewable energy, with a particular focus on photovoltaics (PV). According to the Institute for Renewable Energy (IEO), there are more than 19 gigawatts (GW) of solar projects in planning or development in Poland.
