

South Asia container energy storage recommendation

Overview

How efficient were South Asia's container ports in 2010?

If South Asia's container ports were as efficient as the most efficient ports in the world, in 2010 South Asia's container ports could have handled more than double the number of containers using the same facilities. This is undoubtedly an inefficient use of past investments.

Which countries are preparing for energy storage deployment?

Market dynamics, technical developments and regulatory policies that could be decisive for energy storage deployment in Australia, Mainland China, Malaysia, Singapore, South Korea, Taiwan, Thailand and Vietnam. This white paper explores the opportunities, challenges and business cases.

Can energy storage solve intermittency challenges?

The growth in installed and planned renewable energy generation capacity has driven developers and utilities to evaluate energy storage as a potential solution to intermittency challenges for grid operation and stability and provided investors with increasingly attractive opportunities and projects.
