

Spanish rooftop solar panels

Overview

What is a solar span® roof panel?

SolarSpan® is a three-layered insulated roof panel that consists of two layers of COLORBOND® steel laminated to a high-performing polystyrene core. Its high level of strength and durability makes it ideal for Australian patios, pergolas, carports, verandas, decks, garages and homes. What Are the Benefits of SolarSpan®?

.

What makes solarspan a good patio roof?

Low Maintenance - SolarSpan's COLORBOND® steel roof and ceiling gives a long-lasting, easy to clean finish. Strength - Unlike a single skin patio roof, SolarSpan's strength allows owners to walk on it for maintenance or to retrieve the occasional stray ball. Simple Construction - No rafters or battens are required.

What is solarspan® insulated roofing?

SolarSpan® insulated roofing has been around now for a number of years and has grown in popularity amongst homeowners looking to create an all year round outdoor living space. In the time I have been at Great Aussie Patios, SolarSpan® has fast become the roofing of choice for new patios in Perth. What is SolarSpan®?

.
