Split solar air conditioner

Overview

What is a split solar air conditioner?

Split solar air conditioners are air conditioning system that uses solar energy to power the compressor and the cooling process. They consist of two main components - an indoor unit and an outdoor unit. The indoor unit is installed inside the room, while the outdoor unit is installed outside, usually on the roof or a balcony.

Are solar-powered central air conditioners a mini split?

Though solar-powered central air conditioners exist, most solar ACs are mini splits. Mini splits differ from central ACs because they don't require ductwork to operate. Traditional central ACs consist of an outdoor compressor that pushes air through evaporator and condenser coils to cool it.

How do solar-powered AC units work?

Here's how these types of currents work in solar-powered AC units: DC solar air conditioners: Direct current solar air conditioners use the DC power that is produced by photovoltaic panels. Because these systems don't require an inverter to change the power to alternating current, they're optimal for off-grid applications.

What is a hybrid solar mini split unit?

The Hybrid Solar Mini Split Unit is ideal for expanding or upgrading your system. It includes the A/C unit only and integrates with both solar and grid power. Direct Solar Power is a supplier solar systems for homes and businesses across the USA with a focus quality support. Call 848-600-6420 to start your project today!
