

Sri Lanka solar water pumps pump water slowly

Overview

What is a solar water pump?

Solar pumps are water pumping systems that operate solely on solar energy. They utilize photovoltaic (PV) panels to convert sunlight into electricity, which powers the pump to lift and distribute water from the source to the desired location.

How to promote solar powered water pumping systems in India?

Therefore, to promote solar powered water pumping systems across India, our Indian government has launched the PM-KUSUM (Pradhan Mantri Kisan Urja Suraksha evam Utthaan Mahabhiyan) scheme. Under this scheme, central government is providing up to 90% subsidy on solar water pumps through MNRE department.

Why should you choose a solar pump?

Whether you are a farmer seeking irrigation solutions, a rural community in need of reliable water supply, or an Eco-conscious individual looking to reduce your carbon footprint, our Solar Pumps offer a cleaner, greener, and more cost-effective alternative.
