Taiwan Energy Storage Grid

Overview

What is Taiwan's energy storage policy?

Taiwan's power grid system is an independent power grid. To cope with the impact of renewable energy integration in the future, there is a demand for energy storage systems. The government's policies on energy storage can be summarized as follows: (1) Solving the problem of intermittent renewable energy grid connection.

What is Taipower's new energy storage system?

The new energy storage system adds power for renewable energy! In response to international energy transitions and net-zero emission trends, Taipower is actively developing diverse energy solutions.

What is energy storage equipment in Taiwan?

Taiwan revised its “Renewable Energy Development Act” on May 1, 2019, and Article 3, paragraph 1, Subparagraph 14 of the Act clearly defines energy storage equipment as a means of storage for power which also stabilizes the power system, including the energy storage components, the power conversion, and power management system.

What is Taiwan's energy storage industry?

According to the analysis put forward by the Industry, Science and Technology International Strategy Center (ISTI) of the ITRI, Taiwan's energy storage industry can be divided into batteries, power regulators, power management systems, and system integration (SI), as well as other sectors.
