

# **The first batch of 5G solar container communication station inverters in Russia was completed**

## Overview

---

Who created the first base stations in Russia for 5G networks?

On September 18, 2020, it became known about the creation of the first base stations in Russia for 5G networks. The development is carried out by the leading research center (FACE) "Global Wireless Communication Systems" on the basis of the company " GlobalInformService." [Read more here.](#)

Are there a 5G base station in Russia?

And according to Russian working solutions, there are only prototypes and trial versions of base stations such as LTE-Advanced, they noted. Instances for 5G networks that were created by Rostec did not appeal to operators.

Will Russia test 5G in 2025?

According to Russian news agency Tass, Russia expects to conduct pilot testing of 5G networks in 2025 using "home grown"/ locally built base stations. Russia's Ministry of digital development, communications and mass media Maksut Shadayev said, "We expect a pilot test to begin in 2025 in cities with more than one million people."

Will 5G provide new generation communication services in Russia?

According to the FAS, access to the released radio frequency spectrum for the construction of 5G networks and the subsequent provision of mobile radiotelephone services on 5G networks is an opportunity to provide new generation communication services in Russia.
