

The reason why Dublin shut down the wind and solar hybrid solar container communication station

Overview

How has solar curtailment changed in Ireland since 2022?

Solar curtailment in Ireland has increased sevenfold since 2022, the report found. During the first six months of 2025, 88.725 GWh of solar was curtailed in the Irish Single Energy Market (ISEM), according to a report by Montel Energy, which looks at renewable energy curtailment in both Ireland and Great Britain.

How much solar has been curtailed in Ireland in 2025?

During the first six months of 2025, 88.725 GWh of solar was curtailed in the Irish Single Energy Market (ISEM), according to a report by Montel Energy, which looks at renewable energy curtailment in both Ireland and Great Britain. Solar curtailment in Ireland has increased seven-fold since 2022.

Is solar energy Ireland a sustainable future?

Here are the key takeaways from the blog: Solar Energy Ireland is on a journey toward renewable energy and a sustainable future. Its solar PV systems help generate electricity from sunlight. Solar electricity generated in Ireland has seen remarkable growth, highlighting the expanding contribution of solar photovoltaics to the country's energy grid.

Is Ireland's solar curtailment 'negligible'?

Commenting on its report on Ireland and Great British renewable energy curtailment, Montel Energy's Fintan Devenney described Great Britain's solar curtailment as "negligible" during the first six months of 2025. Solar curtailment in Ireland has increased sevenfold since 2022, the report found.
