

# **Three-phase uninterruptible power supply PE30**

## Overview

---

What is a three phase UPS system?

A three phase supply will deliver more and higher constant electrical power than a single phase power supply, making the three phase standalone UPS system an ideal choice to protect larger applications such as communication rooms, data centers and switch rooms, industrial manufacturing plants and more.

What is a 3 phase power supply?

It's a modular three phase power supply with the ability to expand as needed. Choose a three phase power supply system from 10kVA to 2000kVA to distribute industrial power over long distances.

How powerful is a 3 phase UPS?

With the advent of the new hyperscale data centers, sizing a three phase power supply has changed. 80-750 kVA UPS products are now considered medium and are commonly, but not exclusively, utilized in medium size, or edge data centers with a 1-5MW load range. Small is powerful with the 10-80 kVA three phase UPS models from Mitsubishi Electric.

What products are available in data center & facility 3 phase UPS?

Discover our range of products in Data Center and Facility 3 Phase UPS: Symmetra PX Accessories, Easy UPS 3-Series Accessories, Galaxy Lithium-ion Battery Systems, Galaxy VL, Galaxy VM, Easy UPS 3S, Galaxy VS Accessories, Symmetra PX, Galaxy VX, Galaxy VS

## Three-phase uninterruptible power supply PE30
