

# **Uninterruptible power supply manufacturer in Rotterdam the Netherlands**

## Overview

---

What is an uninterruptible power supply (UPS)?

An Uninterruptible Power Supply (UPS) is used for various applications such as computer, telecom, industrial, or medical equipment. It's crucial for applications where power must not fail, for instance, within operating rooms, data centers, tunnels, and telecom networks.

Who built the first rotary uninterruptible power supply system?

HEEMAF designed and built its first battery-based rotary uninterruptible power supply (UPS) system for a national telecom company. HOLEC designed and installed the first diesel rotary UPS system, a 300 kVA no-break system that was built for a data center application in northern Europe.

What is an explosion-proof uninterruptible power supply system (UPS)?

Orga helps make daily operations easier, with Orga's Explosion-proof (EX) Uninterruptible Power Supply system (UPS). What does an Explosion-proof Uninterruptible Power Supply system do?

The batteries of our EX-certified UPS (Uninterruptible Power Supply) continue to supply power when the normal power supply is cut off.

Why do I need an ex-certified UPS (uninterruptible power supply)?

The batteries of our EX-certified UPS (Uninterruptible Power Supply) continue to supply power when the normal power supply is cut off. This ensures that critical systems keep running in order to keep the asset safe and compliant with relevant regulations in every situation, even in hazardous areas.
