

Uninterruptible power supply planning tool for base station room

Overview

Discover the optimal UPS room layout for your uninterrupted power supply needs. Explore Vital Power's comprehensive guide for efficient UPS installation and management.

Where should your uninterruptible power supply be located?

Your uninterruptible power supply (UPS) must be positioned somewhere safe, secure and accessible. In this article, we explore the fundamentals of UPS room layout and the things you need to consider when deciding where to locate your essential power protection systems.

What is an uninterruptible power supply (UPS)?

Many businesses opt for an Uninterruptible Power Supply (UPS) for vital backup power when the mains or regular supplier fails. Having an Uninterruptible Power Supply in place and properly set up means, as the name suggests, no interruption in power before your standby generator can kick in.

What should I consider when planning an UPS system?

When planning your UPS system and deciding on a configuration, it's crucial to consider potential growth plans. When calculating the size of your UPS, consider the likely growth of the business and the supporting infrastructure the UPS may be called upon to power in an emergency.

Why do I need an ups?

Many UPS models continually condition incoming power as well. Preventing data loss and corruption. Without a UPS, devices that are subjected to a hard system shutdown can lose data completely or have it corrupted. In conjunction with power management software, a UPS can facilitate a graceful system shutdown.
