

Wellington Solar Container Two-Way Charging

Overview

What is two-way charging?

Two-way charging is a two-way solar tariff for residential and business solar customers. It's designed to: encourage customers to export excess energy generated at times when it's needed the most. Why do we need two-way charging?

.

Can I Opt in to solar two-way charging?

Yes, you can opt in to solar two-way charging, however you will see a \$0 solar export charge on your bill. More information about solar rates in your state.

Will I get a \$0 solar export charge in 2025?

From 1 September 2025, some customers in New South Wales and South Australia, will see a \$0 solar export charge on their bill. If we do implement a charge, we'll let impacted customers know before this happens. Can I opt into two-way charging?

.

Do I need a dedicated bidirectional charging unit?

For V2H and V2G bidirectional charging, a dedicated bidirectional charging unit is needed. The charger is designed to convert the DC power from the EV battery back to AC power, which can be used to power a home or send electricity back to the grid.
