## Overview

---

What is a solar air conditioner?

Deye's innovative solar air conditioner series represents a breakthrough in sustainable cooling technology, combining eco-friendly operation with powerful performance. Our solar air conditioners are designed to significantly reduce electricity costs while providing reliable cooling even in the most challenging environments.

Are solar air conditioners energy efficient?

Solar Air Conditioners are the most energy efficient solution to the high costs of air conditioning.

Why should you choose Deye solar air conditioners?

Our solar air conditioners are designed to significantly reduce electricity costs while providing reliable cooling even in the most challenging environments. Explore Deye's innovative solar air conditioners, designed for efficient cooling using renewable energy, featuring hybrid AC/DC technology, and smart monitoring.

How much power does a solar air conditioner use?

Limit AC Grid Power from 0-600W with an AC Power limit. Performs Across a Wide Temperature Range (-10°C to 58°C). The Deye Solar Air Conditioner is an 18,000 BTU air conditioner that can be powered by solar panels. This means that you can save money on your electricity bills and reduce your reliance on the grid.
