## Overview

---

Where can I find information on hydrogen refuelling stations?

LBST has operated the database [h2stations.org](https://h2stations.org) since 2005, offering the most comprehensive information on hydrogen refuelling stations worldwide. Data is collected and updated continuously from multiple sources on a best effort basis.

What is a mobile hydrogen filling station?

These mobile systems enable location-independent refueling, ideal for temporary use at changing locations, major events or in regions where the hydrogen infrastructure is still being developed. Hydrogen filling stations, both stationary and mobile, face several challenges regarding their implementation and efficiency.

Does [h2stations](https://h2stations.org) provide information on the availability of a hydrogen station?

[H2stations.org](https://h2stations.org) does not provide information on the current availability of a hydrogen station, but does provide a global overview of the existing, planned and completed infrastructure. If you wish to submit station data and/or images, please supply such according to this template and send it to [webmaster@h2stations.org](mailto:webmaster@h2stations.org).

What challenges do hydrogen filling stations face?

Hydrogen filling stations, both stationary and mobile, face several challenges regarding their implementation and efficiency. High infrastructure costs are a particular burden on stationary filling stations, as the technology, such as high-pressure storage cylinders and compressors, is expensive and maintenance-intensive.
