# What types of site cabinets are included in the solid-state battery cabinet

## Overview

---

What is a large site support Cabinet?

Large Site Support Cabinet solutions are part of Charles' Macro Site solutions set, combining with CUBE pad mount (PM) and battery backup (BB) cabinets to form a complete site solution. Charles can also create custom designs that integrate specific power solutions.

What are the parts of a battery storage cabinet?

Let's look at the most common parts: Frame – it forms the outer structure. In most cases, you will mount or weld various panels on the structure. The battery storage cabinet may have top, bottom, and side panels. Door – allows you to access the battery box enclosure. You can use hinges to attach the door to the enclosure structure.

What should a battery cabinet have?

Insulation system – insulation is also a safety measure a battery cabinet should have. Grille – it allows for free air flow thereby ensuring efficient cooling. Dual-stage venting system – It is a common technology in electric vehicle battery systems. The first stage will prevent water ingress and equalize pressure.

Which accumulator batteries are included in the cabinets covered by the technical specification?

The cabinets covered by the technical specification have been designed to contain the hermetic lead-acid electric accumulator batteries.
