# Which companies have electrochemical energy storage

## Overview

---

What are electrochemical storage systems?

Electrochemical storage systems, encompassing technologies from lithium-ion batteries and flow batteries to emerging sodium-based systems, have demonstrated promising capabilities in addressing these integration challenges through their versatility and rapid response characteristics.

How much did CATL invest in the National electrochemical energy storage system?

On June 22, 2024, CATL announced its involvement in the National Electrochemical Energy Storage System Construction Project (Phase I). With a total investment of approximately 3 billion yuan (around \$415 million USD), the project will establish an “one center and four bases” model.

Who is ESS Energy Storage?

ESS Inc is a US-based energy storage company established in 2011 by a team of material science and renewable energy specialists. It took them 8 years to commercialize their first energy storage solution (from laboratory to commercial scale). They offer long-duration energy storage platforms based on the innovative redox-flow battery technology.
