

Zagreb solar rooftop power generation system

Overview

Zagreb operates solar power plants with a total capacity of 2.43 MW on public buildings, and an additional 16 MW is set to be installed on roofs, according to Mayor Tomislav Tomašević. Could solar energy be a key to Croatia's energy future?

“Croatia has vast untapped solar potential. By modernising grid infrastructure, supporting energy storage solutions and remove barriers such as the high grid connection costs, we can bring solar energy to the forefront of Croatia’s energy future.”.

What is solar flex in Zagreb?

Launching in March 2025, the Solar Flex event in Zagreb will be the partnership’s flagship initiative, a platform that will focus on sharing best practices from across Europe to find solutions to enhance the grid flexibility, remove barriers and accelerate solar deployment in Croatia and the wider region. “Croatia has vast untapped solar potential.

Why is Solarpower Europe partnering with Res Croatia?

SolarPower Europe’s partnership with RES Croatia underscores our dedication to supporting Croatia and its neighbours overcome barriers to renewable energy growth, including high grid connection costs and the need for an updated grid infrastructure to support solar projects.

What does Croatia's solar partnership mean for the region?

As Croatia approaches the milestone of 1GW of solar capacity, this partnership reflects a shared commitment to supporting the region’s renewable energy ambitions and helping Croatia unlock its significant solar potential.
